July 20, 2004

To Whom It May Concern:

In February of 2003 we purchased the house at 112 Meadow Drive, Seaford, Delaware 19973 from Mr. Brian Papp, owner of K & B Construction, Inc. We have found both the materials and workmanship to be very satisfactory.

This house is the sixth house we have purchased, including the one we built in Jacksonville, Florida.

As an added note, when we had the windows measured for window treatments the installer told us that he had measured windows in houses for 40 years, in price ranges up to \$1 million plus, and he had never seen windows so precisely installed. He indicated that this represented a well-built house where precautions were taken to see that everything was done correctly.

In addition to the above in the summer of 2003 Mr. Papp installed an attic exhaust fan in the roof and the electrician that wired the house added the exhaust fan and garbage disposal wiring.

Should the occasion arise when we would want to build another house in the area or recommend a builder to someone, Mr. Papp would certainly be at the top of our list. We found him pleasant to deal with and willing to please us in every way.

Yours truly,

*Robert G. Haught*
